PROBLEM TO BE SOLVED: To obtain a composition preventing coloring in passing with a time of a preparation containing hinokitiol having an antibacterial action and useful as a hair agent such as a hair nourishing lotion.

SOLUTION: This hinokitiol-containing liquid composition has reduced color in controlling pH at 5.0-6.0 by mixing with one or more kinds of organic acids selected from citric acid, salicylic acid, lactic acid, succinic acid, tartaric acid and malic acid. Coloring is reduced even simultaneously mixing the composition with minoxidil which has formerly been difficult for simultaneous mixing from a view of accelerating coloring of hinokitiol.

Legal Status: There is no Legal Status information available for this patent
